Controller Design Log

Team: _____

Iteration (Challenge): _____

Names (and roles): _____

Sketch or place a picture of the controller and your program below.

1) Was the robot able to complete the sub challenge?

2) Did your program work the way you wanted it to? If not, what was wrong?

(Continued on back) →

3) What are your controller's strengths? What does it do well?

4) What problems does your controller have? What could be better?

5) Describe any new additions or changes to the design that improved the controller from the last iteration.
