

5-K

Question:

What is the difference between the number of gallons used in India compared to the U.S. (in a day)?

Hypothesis:

If you live in the U.S. then you use more water than India.

Data:

The U.S. used a lot more than anyone else.

Conclusion:

We looked on the internet and we found a big difference in water used. Our hypothesis was correct. 105,840 (U.S.)
94.23 (India)
