

Bucket Buddies

Class 201 @ PS 241- Pond Water Study

Hypothesis: The organisms found in pond water are the same all over the world.

We collected about 3 quarts of pond water from Windmill Pond at Alley Pond Environmental Center. Here is a table of our findings:

Macroinvertebrate ID Totals Chart

Macroinvertebrate	Total
<i>Amphipod or scud</i>	4
<i>Caddisfly Larva</i>	4
<i>Damselfly Nymph</i>	6
<i>Daphnia or Water Flea</i>	21
<i>Dragonfly Nymph</i>	5
<i>Mayfly Nymph</i>	3
<i>Midge Larva</i>	11
<i>Mosquito Larva</i>	6
<i>Snail</i>	2
<i>Bristle Worm</i>	1
<i>Leaf Beetle</i>	1
<i>Beetle Larva</i>	3
<i>Unknown</i>	1
Total	68

We also found 3 fish in the water sample.
