

Holden Intermediate School-5th Grade

Holden, MO

120 Fifth grade students identified macro invertebrates from pond water that was gathered from Mrs. Eissler's farm pond. Each team of students took one bucket of water from a large container and then used cups and spoons to catch the critters. They used magnifying glasses to get a closer look.

This is what we found:

Macro invertebrate	Number found
Amphipod	22
Caddis fly larvae	22
Damselfly Nymph	16
Water Flea	1500
Dragonfly Nymph	13
Mayfly Nymph	9
Midge Larva	16
Mosquito Larva	53
Snail	8
Bristle Worm	5

We could use some help identifying the following creatures:
