

**Bucket Buddies question:**

**Are the organisms found in pond water the same all over the world?**

**The sixth grade students of Woodcliff Middle School, Woodcliff Lake, New Jersey traveled to Sharpe Reservation in Fishkill, New York to do their part in this collaborative on-line study.**

## Our hypothesis:

If organism in ponds all over the world are different,  
Then organisms netted in Sharpe Reservation, Fishkill, NY will be different than organisms netted in other ponds all over the world.

We collected specimens.

We observed their behavior.

We used dichotomous keys to help identify our specimens.

## Our data:

Minnow 1

Tadpoles lots!

Snails 6

Boatman beetle 5

Freshwater clam 1

Leech 1

Planarian 2

Damselfly nymph 3

Dragonfly nymph 26

We can't wait to see what everyone else found!
