

4th Grade, Miss Ladwig, New London, WI, USA

Hypothesis: No, there will not be the same macroinvertebrates, because there are different animals around the world. They also have different habitats and different climates.

Our water came from three different ponds around New London.

What we found:

2 amphipods

2 Damselfly nymphs

11 Dragonfly nymphs

10 Water fleas

1 Mayfly nymph

23 Midge larvae

19 Mosquito larvae

2 Bristle worms
